## *Vasarely's Cosmic Visions*

December 11, 2018–May 12, 2019

In 1959 Victor Vasarely issued a portfolio of twelve serigraphs named after prominent stars and constellations in the northern hemisphere and he dedicated these experiments in Op Art to French astrophysicist Alexandre Dauvillier. Our presentation of this complete portfolio will highlight the symbiosis between creative and scientific thinking, as well as celebrate humanity's enduring awe and fascination with the celestial.
