FEbruary 10, 2019
MoA presents
Anthropology Day 2019
Community Celebration

Explore & Celebrate Anthropology's Contributions to Our World!

Free Event
Mizzou North
12pm - 2pm

Cultural Anthropology - examines social patterns and processes within and across cultures
Archaeology - understanding past human life through study of artifacts and ecofacts
 Biological Anthropology - the study of evolution, ecology, behavior, and biocultural variation
Linguistic Anthropology - Records languages and studies how language reflects and influences social life
Medical & Forensic Anthropology - observing factors that influence human health and well-being, and studying causes of death through human remains
Museum Anthropology - sharing lived experiences and scientific discoveries through exhibitions, educational programs, and material collections

Anthropologists are making remarkable contributions to tackling the world's most pressing problems.
Anthropology gives understanding, leading to better quality healthcare, improved school systems, more effectively managed environmental resources, the preservation of heritage and languages, and a celebration of diversity among all people which is imperative to the future success of a global community.
